cristian.deritis@moodys.com

Cristian deRitis serves as Managing Director and Deputy Chief Economist at Moody's Analytics, where he leads the econometric modeling group and specializes in macroeconomic analysis and forecasting. A recognized authority on housing and consumer credit markets, his insights are regularly featured in prestigious publications such as The Wall Street Journal and across Moody's Analytics platforms.

As co-host of the influential "Inside Economics" podcast, Dr. deRitis provides weekly analysis on critical economic developments and their market implications. His expertise extends across the consumer credit landscape, having previously directed Moody's consumer credit modeling and risk management division after managing mortgage credit risk modeling at Fannie Mae.

Dr. deRitis earned his PhD in Economics from Johns Hopkins University, where his research examined the impact of technological innovation on labor markets and income inequality. A Certified Business Economist, Cris holds two U.S. patents for credit modeling innovations and has published significant research on housing, consumer credit, and mortgage modeling. He completed his undergraduate studies with the Honors College at Michigan State University.
