

**Quinn Eddins** is a Managing Director at Greystar and leads Research and Analytics Services for the company's Property Management business. In this role, Quinn provides research and analytical support to Greystar's property management clients, property management teams, and executive leadership.

Quinn currently serves as chair of NMHC's Research Committee.

Before joining Greystar, Quinn was Director of Research and Analysis at CBRE, where he oversaw research on commercial real estate markets across all asset types. Previously, he served as Director of Research at Radar Logic, Inc., producing research on single-family housing markets for clients in the financial services industry and contributing to the development and launch of the RPX real estate derivatives market.

Quinn holds graduate degrees in Real Estate Development and City Planning from MIT, as well as additional degrees from Harvard and Stanford.
