Elsa Marks the Start of Hurricane Season: Are Your District Teams Ready?

As Tropical Storm Elsa barrels through Florida and the southeast, now is the best time for multifamily property owners to take serious stock of their strategies for preparing and dealing with hurricanes. And although this marks one of the first major storms of the season, it certainly won't be the last. NOAA predicts this year's event will feature prominent speakers from the Biden Administration and Capitol Hill.

We've also drafted a step-by-step article to help you make all the necessary preparations as the season gears up—information that you'll want to get now. As Tropical Storm Elsa barrels through Florida and the southeast, now is the best time for multifamily property owners to take serious stock of their strategies for preparing and dealing with hurricanes. And although this marks one of the first major storms of the season, it certainly won't be the last. NOAA predicts this year's event will feature prominent speakers from the Biden Administration and Capitol Hill.

As Elsa barrels through the southeast, we encourage multifamily property owners to take action before the storm arrives. With the potential for wind, storm surge, and flooding, it's important to prepare in advance.

The NMHC Hurricane Preparedness Hub features a compilation of pertinent resources to help apartment firms weather the storm. Click through to read more.

Register for the industry's premier student housing conference, taking place October 4–6 in Huntington Beach, CA. We will discuss how the pandemic is reshaping the student housing landscape and look ahead to coming challenges and opportunities. We've also drafted a step-by-step article to help you make all the necessary preparations as the season gears up—information that you'll want to get now. As Elsa barrels through the southeast, we encourage multifamily property owners to take action before the storm arrives. With the potential for wind, storm surge, and flooding, it's important to prepare in advance.
